CUSTOMER REVIEWS

NEW BOILER

Fast response

Fast response and really helpful advice up front. Job completed in a day no hassle all waste cleared away afterwards. New boiler installed, pump, and radiators flushed

MyBuilder verified review

BOILER INSTALLATION

Highly recommend

All work to be undertaken was fully documented and itemised, and carried out in a single day on the agreed date without any issues. Professional business approach. I would highly recommend.

MyBuilder verified review

BOILER REPLACEMENT

Worked efficiently

Worked efficiently advised us of each stage as they went. Arrived when they said they would, we would highly recommend them to anyone and look forward to having them service our system.

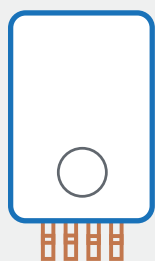

MyBuilder verified review

BOILER TYPES

Our team of heating experts will help you choose the right boiler and accessories for your home and budget.

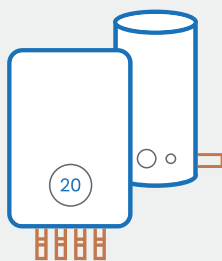

We supply and install a variety of boilers from leading manufacturers.

COMBI BOILERS

Provide heating and hot water from a single unit.

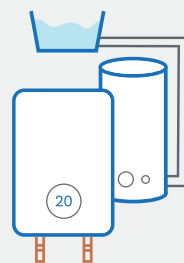

- ✓ Hot water on demand
- ✓ Compact designs
- ✓ Energy efficient

SYSTEM BOILERS

System boilers require a separate hot water tank.

- ✓ Sealed system
- ✓ No loft tank required
- ✓ For larger homes

REGULAR BOILERS

Suitable for larger homes with multiple bathrooms.

- ✓ Easy to maintain
- ✓ Large storage capacity
- ✓ Requires tank in loft

12 YEAR GUARANTEE*

We're a Worcester Bosh accredited installer.

This means our engineers have completed extensive training to offer you the very best service and advice when it comes to Worcester Bosch products.

*Guarantee subject to boiler and filter model

BOILER INSTALLATIONS

We install new boilers from leading manufacturers. As a Worcester Bosch accredited installer, we offer up to a 12-year guarantee and a range of finance options on Worcester Bosch boilers.

From receiving an initial quote to installation and handover, our helpful and experienced heating engineers and support team will be on hand to answer any questions you might have during your new boiler journey.

CHOOSE FLUSHING OPTION

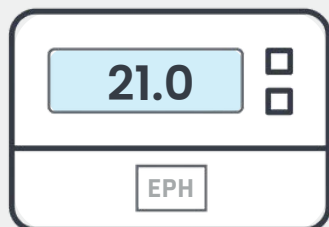

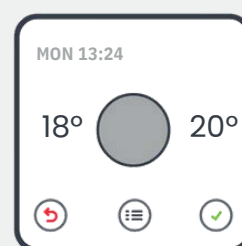

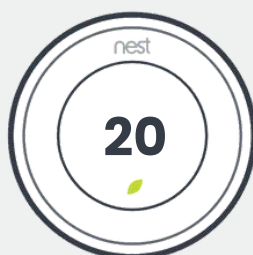

WASTE COLLECTION

At the end of the job, our heating engineers will take away and dispose of your old boiler and waste responsibly.

CONTROLS

Control your heating with your smart device. We offer a choice of smart controls from leading manufacturers to pair with your new boiler.

Our fully trained engineers can install various smart heating and traditional heating controls. We also offer mechanical timers for those wanting a simpler way to control their heating.

FULL CONTROL

Smart controls allow you to manage your heating from your smart devices.

By adapting to your schedule and learning your routine, you can save money on your energy bills by never heating an empty home.

FLUSHING OPTIONS

We offer 3 different types of flushing to keep your system clean and running smoothly.

CHEMICAL FLUSH

Gently removes debris and residue by circulating chemicals around your central heating system.

MINIMUM REQUIREMENT

MAGNA CLEANSE

Cleans your entire system of unwanted materials with the help of a magnetic filter.

RECOMMENDED

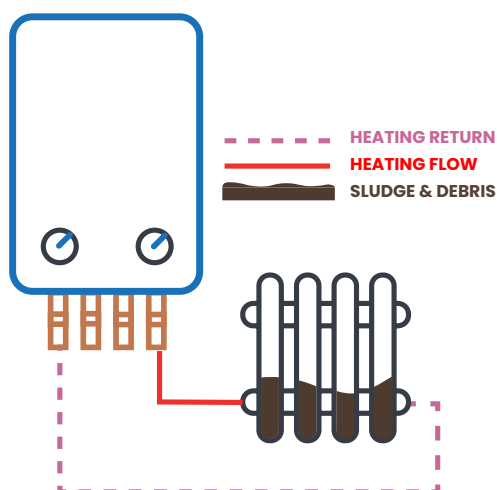

POWERFLUSH

Thoroughly cleans your entire system of unwanted materials to protect your boiler and pipes.

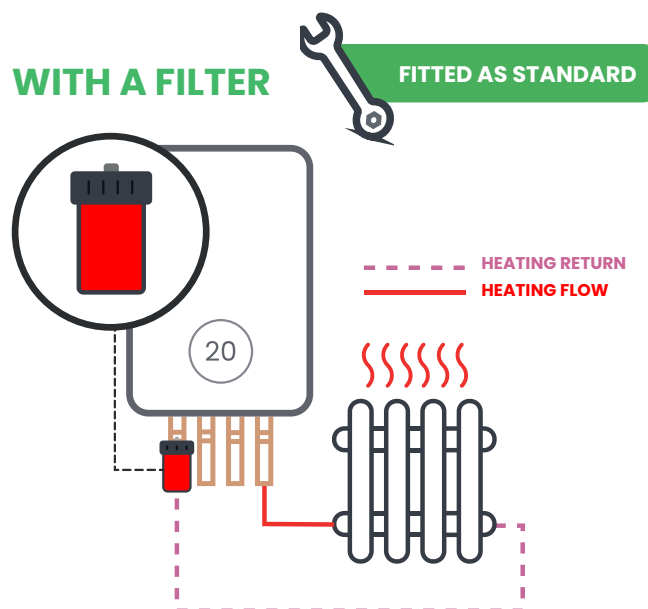

MAGNETIC BOILER FILTER

Protect your system, increase the life span of your boiler and keep your warranty valid with a magnetic filter. Without a filter, debris and sludge build-up, putting your boiler at risk of a breakdown. Magnetic boiler filters attract corroded metals so your system can run efficiently.

WITHOUT A FILTER

WITH A FILTER

INSTALLATION PROCESS

We understand that upgrading your heating can be daunting, so our dedicated and friendly team will make your new boiler installation process as hassle-free as possible.

1

QUOTE

Additional Comments:

OUR SERVICES

We offer a wide range of heating and plumbing services, and we have showcased some of these below.

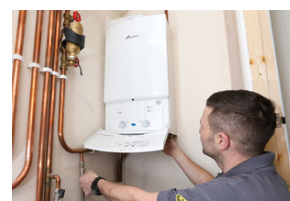

Locally, we are recognised to be your go-to company for all your plumbing and heating requirements.

We research our local market to ensure our pricing remains competitive but will always strive for quality. In addition, all our engineers are Gas Safe & Oftec registered, providing complete peace of mind.

We are a **Worcester Bosch accredited installer** with fantastic customer reviews on Which? Trusted trader. We also offer a range of finance options for your new Worcester Bosch energy-efficient boiler.

Boiler Servicing

Annual servicing will ensure that your boiler runs efficiently and safely for the year ahead and minimises the risk of breakdowns, thus increasing the boiler's lifespan. It also validates any manufacturer's warranty or guarantees for the appliance. More importantly, it ensures that you and your family are safe. Gas safety is paramount, and an annual boiler service will ensure that any problems are identified before accidents occur.

Boiler Repairs

We have a first-time fix rate of 75%, and if parts are required, we can usually source these for the next working day if we need parts we don't hold in our fully stocked vans. We can provide this efficient service because we have a great working relationship with multiple manufacturers and suppliers who understand our customer's needs and share our vision for an efficient, high-level service.

Landlord Services

A qualified gas-safe engineer issues a gas safety certificate. They will inspect all gas appliances on your property and ensure they are safe. If they find any appliance that is not safe, they will issue a repair or replacement order. The certificate is valid for 12 months and must be renewed every year. As a landlord, you are responsible for the safety of your tenants. This includes ensuring all gas appliances in your rental property are safe. To do this, you must have a valid gas safety certificate.

Power Flushing Services

If your central heating system is starting to show signs of inefficiency or not working as well as it used to, it might be time for a power flush. A power flush is a process whereby high-velocity water is forced through your system to remove debris or sludge build-up. This can restore your system to its original performance levels and make it more efficient. A power flush is an effective way to clean your central heating system and improve its efficiency.
